Airbus EC135 will officially debut

The brand-new Airbus EC135 will officially debut on May 10, taking over sightseeing services from the MD902 Explorer while continuing to bring guests on breathtaking journeys across Hong Kong. Like the MD902, the EC135 features a twin-engine design for proven safety, an air-conditioned cabin for year-round comfort, and seating for up to 6 passengers.

Renowned for its advanced avionics, low-noise profile, and excellent hovering stability, the EC135 is widely used worldwide in medical rescue, law enforcement, and corporate transport. For sightseeing, it offers a more spacious cabin and enhanced comfort. A highlight is the option for guests to sit in the front cabin—a rare opportunity in sightseeing helicopters. The front seats provide generous space and an expansive 270-degree panoramic view through the large windshield, allowing passengers to witness the pilot's maneuvers up close and feel truly part of the flight. From Victoria Harbour to the surrounding mountains, Hong Kong's stunning scenery unfolds in a way unlike any previous experience.

New Helicopter Launch Promotion

To celebrate the debut of the Airbus EC135, we are offering a special promotion!

- Victoria Harbour Experience : HK\$14,900 (Approx. 18min)
- Hong Kong Geopark Experience / Lion Rock Experience : HK\$22,500 (Approx. 30min)
